MISSION & OVERVIEW

Eficas Consulting is a general vendor and contracted services provider serving state, county, and local government agencies. We deliver reliable, compliant, and cost-effective solutions across a broad portfolio of public-sector needs — bringing private-sector efficiency to public service. Our model gives public partners a single accountable vendor across multiple service categories, reducing procurement overhead and the burden of managing many small contractors.

CORE CAPABILITIES

■ IT Services

Infrastructure support, hardware and software procurement, systems integration, help-desk and field support, network and endpoint management for public agencies.

■ Construction & Facilities

Light commercial construction, renovations, repairs, and public-works support. Coordination of qualified subcontractors with full insurance and bonding compliance.

■ Land Management

Site maintenance, lot clearing, mowing and grounds upkeep, environmental and right-of-way maintenance for parcels held by county and municipal agencies.

■ Neighborhood Revitalization

Community development support, blight remediation, board-up and clean-out, facade and lot improvements, and coordination of multi-trade revitalization scopes.

■ Supply-Side Management

Sourcing and fulfillment of medical supplies, local government equipment, and office supplies. Recurring-purchase programs and just-in-time delivery available.

■ Program & Vendor Coordination

Single-point-of-accountability management of multi-trade scopes and supply contracts, with documented reporting and prevailing-wage compliance where applicable.

DIFFERENTIATORS

- **Single point of accountability.** One vendor, one contract, one POC across multiple service categories — eliminating coordination overhead for procurement officers and project managers.
- **Compliance-first operations.** Documented processes for solicitation response, insurance, bonding, prevailing-wage and Davis-Bacon requirements, MWBE participation, and reporting.
- **Local sourcing where possible.** We prioritize local subcontractors, suppliers, and labor to support community economic impact and reduce delivery times.
- **Transparent, competitive pricing.** Flat-fee or competitively bid pricing on every scope. Itemized quotes that separate pass-through costs from service fees.
